## Drug Cabinet Exports

Since 1961 FPD Group Ltd's family have been supplying medical equipment. Our extensive experience and technical knowledge now concentrates on providing clients with a quality selection of products for hospitals and healthcare organisations worldwide. We receive export enquiries and orders from all parts of the world and have established customers in UK, Europe, Africa and Asia. Export business activities are supervised by either our UK or Asia offices.

Our client base ranges from overseas ministry of health, defence, hospitals, surgeries, clinics and doctors to aid agencies and disaster relief. FPD Group Ltd export almost any medical product listed on our websites.

FPD estimators have the expertise to supply a single item or to fully equip many types of healthcare facilities. As well as the initial supply of equipment we also offer room design services using our in-house Autodesk Revit Architecture 2013 CAD systems.

*\* Export items are normally subject to minimum order values, additional protective packing charges and export shipping costs. Prices shown are Ex Works unless otherwise agreed in writing.*

## About Drug Cabinet

Drug Cabinet supply a wide range of lockable cabinets meeting the specifications of the healthcare industry. To buy simply add your required product to the shopping cart and submit your order.

Are you storing your controlled drugs and medications correctly? The Shipman Report highlighted medication storage and distribution requires careful consideration in all establishments, government Home Office guidelines outline how to achieve higher levels of safety. UK Legislation dictates that all 'Health-Care Premises' ensure that their Drugs and Medicines are stored in cabinets which comply with relevant standards or regulations.

Drugs and Medicines, with the exception of Controlled Drugs must be stored within cabinets that comply with BS2881:1989. This standard details the security requirements and testing procedures necessary to ensure compliance. Our large range of CD controlled drug cabinets comply with these standards. If ensure as to what level of security is required or the positioning please contact our specialist sales team.

The storage of Controlled Drugs is an area that is often misunderstood, for some years there has been the belief that Controlled Drugs should be stored in 'a cupboard within a cupboard'. Whilst this will provide an additional deterrent and improve the level of security, the principal requirement is that the cabinet that is being used to store the Controlled Drugs must meet the requirements of the 'Misuse of Drugs (Safe Custody) Regulations 1973'.

This regulation details very clearly the gauge of steel, type of lock, construction method and the way in which the cabinet is secured to the wall and, unless local (hospital) policy dictates otherwise, whether it can be wall mounted independently of any other cabinet.

Our range of drug cabinets often exceed these requirements, whilst certain strengthened cabinets provide an even greater level of security, constructed using a heavier gauge steel, reinforced lock and multiple point locking. This range makes them ideal to be used in areas where it is perceived that there is a greater risk of attack, i.e. located in unmanned areas for long periods of time.

Please contact us for more information on our extensive range of Drugs & Medicines Cabinets.

- Site Survey Telephone Advice
- Assistance with determining the suitability of current cabinets
- Recommendations where cabinets do not meet current legislation

## FPD Group Ltd

FPD Group Limited is a family business with over 50 years experience in the supply and installation of a wide range of Healthcare Equipment, Medical Refrigeration and Hygienic Storage Furniture.
